As an International Baccalaureate School, we incorporate 10 Learner Profiles daily into our learning: inquirer, knowledgeable, balance, risk-taker, communicator, caring, reflective, open-minded, thinker, and principled. On top of that, we use Global Concepts, like sustainability or science and technology to make connections with our classroom studies and global studies. Our Approaches to Learning teach us to self-manage, conduct research, be critical and creative thinkers, collaborate with others and communicate our knowledge.

The 8th grade at Estrella Mountain Elementary have been working extremely hard on this culminating project since August. With a teacher mentor to help guide them, they have chosen community and global concepts to address and make a difference. Incorporating all the IB learner profiles and Approaches to Learning, the 8th grade will exemplify what it means to be an IB student. Please come support their efforts by viewing their project presentations and also see what future projects our students will be immersed in their 8th grade year.
